SLACK ADJUSTERS

The **DI-PRO Automatic Slack Adjuster** is based on a clearance sensing principle design which is the standard choice of most Original Equipment Manufacturers in North America. It is interchangeable with the majority of automatic slack adjusters currently in service and in the appropriate configuration, can be used on all applications with S-cam brakes.

Major Features

- Various Slack Adjusters are available to fit a wide range of trailer, truck, and transit applications.
- DI-PRO ASA's can be wound back easily allowing the brakes to be serviced and are well sealed against dirt and moisture.
- Correct functioning of our ASA's is easy to check and confirm when installed.
- All slack adjusters are supplied boxed as single units with full fitting instructions included.
- Fixing brackets and lining wear indicators are supplied and included as appropriate.
- Tested and certified to SAE J1462 as well as ABE through TÜV.

For those applications that an automatic slack adjuster just won't work, try a **DI-PRO Manual Slack Adjuster**.

Major Features

Various Slack Adjusters available to fit a wide range of trailer, truck, and transit applications.

Coated for protection against rust, moisture and various other contaminants.

All slack adjusters are supplied boxed as single units with full fitting instructions included.

Tested and certified to SAE J1462 as well as ABE through TÜV.
